

US Application 09/310,596**Proposed Claim Amendment for Purposes of Examiner Interview on 09/18/2003****Examiner: William C. Vaughn Jr.****Applicants' Representative: Kurt Chang (Leydig, Voit & Mayer)**

43. (Amended) A computer-readable medium having stored thereon a data structure for processing streaming data through multiple restructuring processing modules in a graph, comprising:

a single composite frame physically allocated in a memory; and

a plurality of virtual subframes allocated within the composite frame for storing the streaming data; and

a pipe control table representing the structure of a pipe of modules for processing streaming data in the data structure, wherein the pipe is a connected group of multiple ones of the processing modules in the graph, at least one of the modules being a restructuring module;

whereby the streaming data are transported through different ones of the modules in the group in different ones of the subframes and restructured among at least some of the subframes in the restructuring module.
